

Hello,

Welcome to the Rocky Mountain Education Center. We would like to thank you for choosing our Specialist Certificate Program from the many that are out there. At this point in time we have Five Specialist Certificates to choose from Construction Safety and Health Specialist, Safety and Health Specialist and Environmental Safety and Health, Oil and Gas Safety and Health Certificate as well as Stormwater Specialist Certificate. We will keep you update on any changes that may come.

First, a little history on how the specialist certificates came to be. The certificate program started in 1996, as a way to offer our clientele an opportunity to receive a Specialist Certificate in three areas Construction, General and Environmental. To date 329 students have completed the Specialist Certificate Program, and many more people interested in this program and are working towards completing their certificates.

If you are interested in signing up for the Specialist Certificate program look through the attached packet and choose the certificate you are interested in taking. Fill out the top part of the application and return it to Michelle Asher. You may complete any of the applications at this time & add additional ones later or work on all 3 at the same time. There is no time limit to finish this program; it is at your own pace. This certificate DOES NOT expire.

The staff here at Rocky Mountain Education Center would like to thank you again for choosing our Institute for your OSHA training and for choosing our Specialist Certificate Program.

If you should have any questions or concerns regarding the Specialist Certificate Program please feel free to contact Michelle Asher at 800-933-8394 or 303-914-6423 or via email at michelle.asher@rrcc.edu.

Sincere Regards,

Michelle Asher
